

# RCGP Post-Covid Syndrome (Long Covid) ECHO

GPs across the UK are seeing increasing numbers of patients with Post-Covid in their surgeries. While the exact mechanism of this new disease is not yet clear, its effects are, and we are witnessing our patients suffer with no definitive answers.

There is no textbook to guide us on this new challenge so we will have to draw on our greatest strength – each other. Join us as we learn from each other and share best practice to support our patients safely and effectively in the community.

**Launching**  
**7th October 2021**  
**7.30 to 9.00pm**

the sessions will take place on the  
1st Thursday in the month

Using the ECHO approach where everyone is a teacher, everyone a learner, the sessions are designed to share best practice from GPs around the country and view how each practice manages this condition differently. The sessions will be a relaxed, informal, and safe space for GPs to meet and learn from each other, rather than a textbook.

Each month a different aspect of the disease will be covered, from typical presentations to specialist areas such as Post-Covid in children and those with pre-existing, complex medical histories.
